EDUCATION

Huachiew Chalermprakiet University

BBA Business Computer
2013 - 2017

Sanook Online Limited

Internship - Tester
June - July 2016

TECHNICAL SKILLS

Business Analysis

- BRD
- SRS
- User Stories
- AC
- Requirement Gathering
- System Flow
- MermaidJS • draw.io • Jira • Notion

Currently Working With

- Node.js
- Next.js
- React.js
- Tailwind CSS
- MongoDB
- PostgreSQL

Also Experienced

- C# / .NET
- PHP / WordPress
- Vue.js / Quasar
- SQL Server / MySQL

Tools & DevOps

- Git / GitLab
- CI/CD / Octopus
- RabbitMQ
- REST API
- Agile / Scrum

SOFT SKILLS

- Analytical Thinking
- Team Collaboration
- Attention to Detail
- Fast Learner
- Problem Solving

ARISARA RUTTAKAN

TECHNICAL BA & FULL-STACK DEVELOPER

SUMMARY

Full-Stack Developer with 7 years of experience, currently expanding into Technical BA — bridging hands-on development with requirement gathering, system design, and documentation.

EXPERIENCE

Manufacturing Industry Client (Confidential)

Technical BA (Freelance)

June 2026 — Present

- Lead requirement gathering and discovery sessions for an Integrated ERP system in the manufacturing industry.
- Document comprehensive BRD covering 35+ features across 5 core modules.
- Develop detailed SRS, incorporating user stories and strict acceptance criteria.
- Design system architecture diagrams, sitemaps, and overview flows using MermaidJS.

Full-Stack Developer — Personal Projects

Full-Stack Developer

Jan 2025 - May 2026

- Built full-stack Hotel Booking App using React, Node.js, Express, MongoDB and JWT authentication
- Developed AI Manual Assistant — full-stack app with AI-powered Q&A, user authentication and activity logging, using React, Node.js, TypeScript, Prisma and PostgreSQL
- Developed animated portfolio website with Next.js, Tailwind CSS and Framer Motion
- Deployed applications to production (Render + Vercel)

SoftSq

Software Developer

Sep 2018 - Nov 2024

Key Projects

- Developed and maintained large-scale Tour Management System (TourProX) using C#, SQL Server and MongoDB
- Built real estate platform using Vue.js / Quasar Framework
- Customized enterprise LMS platforms for multiple clients with varying requirements (WordPress, PHP, government API integration)
- Built automated web scraping and production data import system using Node.js, RabbitMQ, and MongoDB

Architecture & Development

- Designed software architecture and database structure for business systems
- Conducted functionality testing across frontend and backend integration

Team & Process

- Collaborated with cross-functional teams (sales, dev) to define solutions and assign tasks
- Analyzed requirements and proposed technical solutions

CI/CD & Operations

- Experienced with CI/CD pipelines (Octopus Deploy, GitLab) and Agile/Scrum methodology
- Troubleshoot and resolved production issues

Quark System

Programmer

Nov 2017 - Aug 2018

- Developed desktop applications using C#/.NET, WPF and SQL/PL/SQL
- Designed database architecture and monitored system performance
